More than a catalogue: we're here to help you find the right solution for your materials handling needs

## Stainless Steel Clad Forks

- Ideal for harsh or hygiene environments, such as fisheries, food or chemical industries; or in potentially flammable applications.
- The flat 304/316 Stainless Steel sheet is cut by Bystronic Laser Cutters. Pressed to individual shape, assembled and sections welded together.
- Sanded and polished leaving an unbroken and highly polished finish.
- Cladding for pallet trucks, order pickers and big forks also available.
