

Auto-Lok Tipping Skip

Model – IATS-2M

Description

The **Auto-Lok Tipping Skip** has been designed to reduce risk and increase efficiency during the emptying process. Simply drive your forks into the pockets and the automatic mechanism will lock itself to the forks of the Telehandler when elevated, this negates the Forklift Driver exiting the safety of his cab. Also includes the added benefit of 4-way pocket entry for ease of positioning on site. This new unit incorporates a brand new mechanical spring assisted retention mechanism.

Model	Nominal Capacity (m ³)	Capacity (kg)	Length (mm)	Width (mm)	Height (mm)	Weight (kg)	C of G (mm)	LLC (mm)
