

Plastic Mortar Container

Model – IPMC-EP-250LTR

Description

The **plastic mortar skip container** has been designed to aid the safe transportation of mortar around a construction site. With the enclosed fork pockets, this gives greater stability and safety on site as this feature stops the possibility of the container tipping off the forks whilst in transit and whilst lifting at height.

Model	Length (mm)	Width (mm)	Depth (mm)	Capacity
IPMC-EP-250LTR	1120	860	635	250 litre

Standard Features

- Ribbed Body for added strength
