

Winter attachments

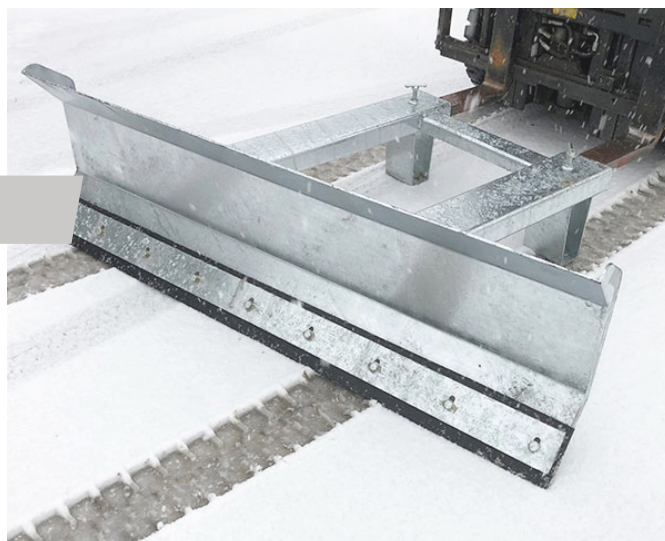

Clear snow and ice safely and quickly

Stay one step ahead of bad weather this winter. Our forklift ice and snow attachments help winter-proof your operations, no matter how harsh the weather gets. Our range provides simple yet effective solutions for clearing snow and ice, minimising disruption to operations

ISP

SNOW PLOUGH - FIXED BLADE

The fork-mounted Snow Plough clears freshly fallen or compacted snow in seconds. It allows safe access for vehicles and people to car parks, access roads and service yards. The plough has a fully galvanized finish and comes with an optional rubber blade insert.

ISP-ADJ

SNOW PLOUGH - ADJUSTABLE

The Adjustable Blade Snow Plough is suited to clearing snow on paths and roads with bends and curved borders. The plough clears freshly fallen or compacted snow with ease, allowing safe access for vehicles and people to car parks, access roads and service yards.

ISP-4

SNOW PLOUGH

FLEXIBLE POLYETHYLENE BLADE

Often seen as a winter product, this snow plough is versatile, durable and has multiple uses. Primarily used to clear fresh fallen or compacted snow, they also offer a fantastic secondary use out of season for clearing yards and loose debris such as gravel.

IMG

MINI TOWABLE SPREADER

Use your existing forklift and tug machine to salt your private access road and goods yards with the towable spreader. The spreader is attached with either a standard towing eye or ball hitch. It salts the area via the contact axle wheels and gearbox without any electrical or hydraulic connections..

IHG-1

HYDRAULIC GRITTER

A hydraulically driven salt spreader/gritter, with safe and convenient fork pockets for front mounting. It is driven from the forklift truck's third service valve or side shift valve. Fitted with stainless steel double auger system which can spread all types of salt, with a 0.20m³ hopper to take around 250kg of salt.

IFMS

FORK MOUNTED SWEEPER

'THE BASIL'

The Fork Mounted Sweeper is a quick and easy solution for clearing snow and slush, and re-heaping loose granule products such as sand, topsoil, grain or similar. Available in 4 width combinations and 2 brush row combinations.

Stay LOLER compliant with Thorough Examinations

Our service keeps the process simple

Lifting equipment and accessories, such as access platforms, must be inspected for safety every 6 months. Our Consolidated Fork Truck Services (CFTS) Inspector attends your site and leaves you with a report of thorough examination, including the next inspection date, as required under LOLER.
