

## Excavator Forks

### Model – IEFF

### Description

This range of Excavator Fork attachments are designed to enable an Excavator to lift palletized material. This is especially useful if space/maneuverability is restricted on site, as it ensures you only need minimal machines at any one time.

Available in two sizes to suit Excavators ranging from 5 to 22 tonnes.

Model	Length (mm)	Width (mm)	Height (mm)	Weight (kg)	SWL (kg)
IEFF-5-9T	2150	990	610	241	1000
IEFF-13-22T	2410	990	610	375	2500

### Standard Features

- Quick and easy to attach, with adjustable pin centres and different pin sizes to suit any model of Excavator quick hitch
- Ability to see through the unit allows clear visibility of pallet/load for the Excavator Operator
- Fork Tines can be folded over the edge of the unit for compact storage
- 'Floating' forks allow for easier placement and easier Lifting on uneven surfaces
- 1000kg Excavator Forks can be supplied with 45, 50 or 60mm pins to suit 5 to 9 ton Excavators
- 2500 kg Excavator Forks can be supplied with 65 or 80mm pins to suit 13 to 22 ton Excavators
