

## Crane & Access equipment

A selection of invicta attachments which provide crane lifting solutions to the construction industry, more specifically high-rise developments where space is minimal to transport building materials safely and efficiently.

### IPF

#### AUTOMATIC PALLET FORKS

The Automatic Pallet Forks effectively convert an overhead crane into a pallet moving tool. There are many applications where fork trucks cannot be operated due to a lack of floor space for example high rise developments. These crane forks are equipped with adjustable forks, height adjustable and an automatic balancing system, along with pre-fitted safety net system. Net supplied separately.

### IPF-BOS-CAGE

#### CRANE PALLET FORK CAGE

The cage is designed for the safe lifting of brick packs, blocks and other building materials at height. It provides a safe environment and protect operators from any potential collapsed loads during operation, helping to eliminate risk.

### IBS

#### BOAT SKIP

Our Boat Skips include a specific self-dumping system, used for general muck and waste removal. These high-quality skips perform efficiently and safely as they are lifted and empty automatically without the need of any assistance, eliminating risk to personnel and operatives alike. The robust manufacture suits the harsh environments in which the skips are used.

**IBB**

## **MATERIALS / BRICK LIFTING CAGE**

The Invicta materials/ brick lifting cage is specifically designed for the hoisting of building materials, with overhead crane lifting point. Safe working load of 250kg, with mesh sides for visibility & safety of product transportation.

**HS-SBC**

## **SAND BAG CARRIER**

Specifically designed for the safe movement of sacks, ballast or similar by connecting the lifting straps through four welded lifting hooks. With its single lifting eye, the unit can be fitted to overhead cranes, HIAB or forklifts via a swivel hook.

## **Stay LOLER compliant with Thorough Examinations**

### **Our service keeps the process simple**

Lifting equipment and accessories, such as access platforms, must be inspected for safety every 6 months. Our Consolidated Fork Truck Services (CFTS) Inspector attends your site and leaves you with a report of thorough examination, including the next inspection date, as required under LOLER.
