

Fork Repairs

Designed to effectively extend the life of your forks

We offer expert fork repair and refurbishment services that help get your forks up and running again quickly and cost-effectively. We don't just mend; we extend the life of your forks.

FULL FORK REPAIRS AND RE-TESTS

Forks can be a costly purchase, and when you add to that potentially long lead times, buying new isn't always the most efficient or cost-effective option. Depending on the extent of the damage and wear, at Invicta, we can often provide a full fork repair and re-test service.

REDUCE DOWNTIME

Our repair service saves not only on costs, but also reduces the downtime of your machines – drastically reducing the operational impact on your business, particularly if you rely on your machines for day-to-day use.

WE REPAIR MORE THAN JUST TELEHANDLER FORKS

Predominantly the volume of Fork Repairs is Telehandler Forks, however we do also repair and retest:

KALMAR Full Roller Forks (Including replacing Rollers and Bearings) - Terminal West Forks
SMV and KONE Forks - Double Pallet Handler Forks (KAUP/Bolzoni/Cascade)

FAST LEAD TIME ON REPLACEMENTS

As one of the largest stockists of forks in the UK, our turnaround is second-to-none. If we're not able to repair your forks we'll quote for replacements.
