

Invicta Poles and Booms

Handle coiled products safely and efficiently with Invicta's range of poles and booms. These allow safe lifting and positioning of materials that can't be handled with standard forks, delivering reliable performance across construction, warehousing and manufacturing sectors.

IFB

FORK MOUNTED POLES

Perfect for occasional use and mixed applications, the fork mounted pole handles various coiled products efficiently, offering flexibility for both palletised and coiled loads.

ICP

CARRIAGE MOUNTED POLES

Designed for regular coiled product handling including fabric, carpets, paper rolls and linings. Mounts directly to the forklift carriage for full lifting capacity and control.

IFIB

INLINE FORK MOUNTED POLES

Built for low-volume operations handling both standard pallets and coiled products, the inline fork mounted pole offers the versatility to switch between different load types.

Bespoke Options

ROLLER POLE

UNDERSLUNG POLE

COIL BOOM

We design and build poles and booms to solve specific handling challenges that standard products can't address. We manufacture from 100kg to 5000kg capacity, in both fork-mounted and carriage-mounted configurations. Whether it's unusual coil sizes, restricted spaces or unique operational requirements, we'll engineer a solution that's fit for purpose.

Stay LOLER compliant with Thorough Examinations

Our service keeps the process simple

Lifting equipment and accessories, such as access platforms, must be inspected for safety every 6 months. Our Consolidated Fork Truck Services (CFTS) Inspector attends your site and leaves you with a report of thorough examination, including the next inspection date, as required under LOLER.
